Profile

As a trained application developer with experience in product support and incoming sales representation, I seek to utilize my technical skills and software development knowledge to contribute to the growth and success of a company. My goal is to be part of a dynamic and collaborative team, where I can apply my communication, problem-solving, and teamwork skills to provide innovative and quality solutions to technological challenges. I am committed to continuous learning and professional growth, and I am excited to take on additional responsibilities and exceed my short-term and long-term goals.

Education

Computer Science   **Jul 2018 - Jan 2025**
PUCMM, Santiago de los Caballeros
- Developed CutLink, an application using HTML, CSS, JavaScript, Python, H2, Hibernate, and Javalin as a microframework, which provides users with link shortening functionality and allows them to view statistics like user-agents, IP address, and platform of visitors.
- Designed and programmed software in Java for an administrative project of electronic shops, including users, tracking of parts (stock and sales of products), customers, graphical charts, and messages between administrators and sellers.
- Developed a Django-based traffic violation detection system using YOLOv8 and OpenCV, enabling real-time vehicle tracking and detection of violations based on predefined ROIs. Implemented video processing, optimized streaming, and automated violation logging with image capture and metadata storage.

HIgh School   **Aug 2015 - Jun 2016**
Colegio Bautista de la Gracia, Santiago de los Caballeros

Employment

QA Tester   **Sep 2023 - Dec 2023**
Jomasys SRL, Santiago de los Caballeros
- I worked as a QA Tester at Jomasys SRL, a company dedicated to creating software for vehicle dealers in the Dominican Republic. The programs were developed to cover different aspects of the businesses involved, from managing their inventories to the most sensitive aspects such as their finances.
- As a QA Tester, I was responsible for ensuring the quality of the software developed by Jomasys SRL. I did this by designing and executing test plans, identifying and reporting bugs, and working with developers to fix bugs. I also helped to improve the overall quality of the software development process.

Product Support Specialist

LiveOps, Santiago de los Caballeros

- Identified, triaged and escalated issues to internal personnel along with clear outline of problems and technical detail.
- Performed troubleshooting and tested customer issues via phone, email and remote assistance software.
- Captured client feedback and recommended product enhancements based on personal expertise and evaluation of customer needs.
